

Revo-Office

Revo-Office

Film cassette lifts out for easy change and replacement.

The Revo-Office is the first film cassette laminating system that combines automatic feeding, laminating and cutting in one process. Set the number of sheets, margins and push the start button - no need to oversee, the machine will stop when sheets are laminated and cut. Top opens easily to lift out film cassette and to clean.

Revo-Office

Automatic roll-fed encapsulation laminator with auto-feed and cutter. With a push of a button, laminate quickly without the need of operator assistance per sheet. Compact size, simple operation and speed makes this laminator perfect for the office, school environment or print shop.

Customer Benefits

- Compact design fits easily in an office or school environment
- One button push start - will automatically stop when complete
- Up to 3x faster than pouch lamination and can process up to 240 sheets per hour
- Simple access from top for easy cassette change
- Feeder holds up to 200 sheets
- Sleep mode lowers temperature after 10 minutes to save power
- Internal rotary cutter for improved safety
- Set margins sizes and number of sheets with easy to use digital panel
- Great for schools, offices and copy shops
