with stand (included)

Revo Flex
Four side trim function
with or without margin.

Revo Flex
Sheet Feed Skew
Adjustment.

Revo Flex

Join the revolution with the all new **Revo Flex** next generation fully automatic laminator. The **Revo Flex** 4 side trimming system allows for true flush cuts or encapsulating a sheet with lamination. The position of the cuts are fully adjustable to create perfect flush cuts or custom size encapsulation borders. No need for additional processing to trim all 4 sides of a sheet. Feeding, laminating, cutting and trimming are now fully automated with the press of the start button.

Customer Benefits

- 4 side internal trimming system for flush cut or encapsulation
- New no waste run mode eliminates sheet trim
- Compact design with stand included
- Automatic paper feed, laminate and cutting in one process with one button push start
- Automatically stops when complete
- Adjustable speed for high quality results on various sheet weights and film thickness
- Process up to 420 sheets per hour
- Simple access from top for easy roll change
- Adjustable resist roller pressure to stop multi-sheet feeds over a range of paper stocks
- Feeder holds up to 200 sheets
- Easy to use touch panel for all adjustments
